LETTER OF RECOMMENDATION

American Express Global Business Travel provides travel and expense management solutions for corporate customers. It is an international enterprise noted on the New York Stock Exchange with one of its subsidiaries located in Hungary that is specialized for business travel services.

In 2011 American Express Hungary Ltd. decided to introduce EDInet PKI Adapter offered by INFINITE & DOCCA in order to enhance communication with its customers. The character of American Express Hungary Ltd. business activity means that the documents are exchanged in rather small quantities with a single customer, though the number of recipients is numerous. The implementation of EDInet PKI Adapter enabled American Express Hungary Ltd. invoice issuing, sending and receiving, what in comparison with the paper transactions in the past, contributed to significant time and cost savings. Thanks to the integration with accounting system, the invoice format is automatically transformed into PDF. It is vital that each invoice is marked with the time stamp and digital signature, consequently it is possible to easily verify the document authenticity.

As our cooperation with INFINITE & DOCCA proved successful, we would like to recommend this company to the enterprises planning to introduce Electronic Data Interchange systems to their business, in particular EDInet PKI Adapter. All deadlines have been met by INFINITE & DOCCA. During the implementation process we could rely on their professional and timely assistance.

Edina Nagy-Biró

General Manager

American Express Hungary Ltd.
