LETTER OF RECOMMENDATION

Kreisel Technika Budowlana Sp. z o.o. is one of the leading producers of building materials, operating on the Polish market since 1993. Kreisel offers a wide array of construction materials for building, renovating and decorating apartments, houses and offices.

So as to efficiently manage the increasing volume of processed documents, Kreisel decided to implement INFINITE EDI communicator. The solution has been successfully used since 2012. EDI communication allows for the transmission of orders and invoices between Kreisel and chains it cooperates with. Not only did the automation of data interchange reduce the number of errors, but it also streamlined administrative processes in the company. Moreover, the costs connected with printing, packaging and shipping documents have been significantly reduced. The benefits of EDI deployment are also experienced by shopping chains, being Kreisel business partners, which by means of INFINITE EDI communicator can faster execute processes within the supply chain.

Based on the cooperation hitherto Kreisel would like to recommend Infinite. The implementation phase was completed within the agreed schedule. What is more, competent trainings as well as expert customer service by Infinite employees are worth emphasising.
