

Benei:

fast and precise data exchange by the Infinite EDInet Suite

Az én kedvemem

Benei és Társa Vagyonkezelő Kft. is one of the largest players on the Hungarian confectionery market. The company constantly invests in new technologies, improves communication with business partners as well as ensures that their technology park meets the highest standards. Continuously growing sales and document flow made Benei implement the Infinite EDI Connector platform, by which it has optimized the exchange of commercial documents, streamlined the processes of processing orders and sending invoices.

Country: **Hungary**

Time: since **2010**

Solution: **Infinite EDInet Connector**

BEFORE DEPLOYMENT

Before implementing electronic data exchange, all orders and invoices flowed between Benei and its business clients in paper form. This caused large delays in the execution of orders, generated errors and was a source of problems with on time delivery of invoices. With the growing volume of documents, the natural step was to implement a solution that would streamline and automate communication with the contractors.

PROJECT REQUIREMENTS

The main goal of implementing the EDInet Connector was to improve communication and document flow between Benei and its contractors. The implementation covered primarily the area of commercial and financial documents (orders, invoices). By replacing of the paper version of electronic documents, shorter circulation time has been obtained and the costs related to their maintenance have been permanently reduced. In addition, Benei has implemented the Infinite e-Archive Suite platform to store electronically invoiced data in an appropriate manner. All this has resulted in easier and faster access to archival documents for each authorized user.

DEPLOYMENT

Infinite IT Solutions, in cooperation with the DoCCA Partner, provided and implemented the EDInet Connector platform for Benei, which since 2010, has been handling the automatic exchange of electronic documents (including orders and e-invoices) and synchronizing data between business partners. By the implementation of the system, the company has gained constant monitoring of the commercial and financial processes taking place within the organization. From the point of view of the customer, the introduced change has improved and accelerated work of many people. The EDInet Connector platform has introduced the electronic form of transferring documents, therefore, full commercial correspondence flows smoothly to specific persons responsible for the implementation of individual tasks.

AFTER DEPLOYMENT

Since 2010, Benei has been using Infinite EDInet Suit, which has fully automated the flow of documents (invoices and orders). Currently, the delivery of Benei products to its final customers is much faster and the cost of orders is definitely lower. It is worth noting, that Benei reduced the workload related to the manual processing of invoices and accelerated the process of document exchange. Implementation of Infinite EDInet Connector has brought the following benefits:

- Elimination of errors resulting from manual handling of documents
- Eliminated need to restore lost documents (nothing is lost) and the risk of losing documents
- Improved relationships with contractors
- Possibility of integration with systems (ERP) used by business partners
- Faster collection of receivables
- Eliminated duplicate orders

By the implementation of solution, Benei gradually increases its profits by reducing errors occurring during manual handling of documents and their faster processing, while quicker response of the company results in greater satisfaction.
